

Controlled Inventory, On-Site, 24/7 Access by Your Employees

Reduce Product Consumption, Inventory and Administrative Costs

Controlled Inventory, On-Site, 24/7 Immediate Access by Your Employees

24/7 ACCESS BY YOUR EMPLOYEES

Inventory at point-of-use within your plant or on your jobsite.

INCREASED ACCOUNTABILITY

Keep track of what employees are consuming, and how often.

AUTOMATED REPLENISHMENT

No worries on products running low, or need to be restocked.

COST ACCURACY TRACKING

Follow by department, by the employee, by the job.

REDUCE YOUR INVENTORY SPEND

Reduce product consumption and waste.

Achieve 25% to 40% Reduction In Consumption

Our customers, in some cases, realize significant reduction in the quantities traditionally ordered as employees are more in sync with the cost impact of the items they typically consume daily.

Eliminate On-Hand Inventory and Administrative Costs

Our customers achieve significant direct & indirect cost savings. It's EZ to cut the fat out of procurement.

WHAT YOU GET

24/7 Easy Access To Key Products You Need Readily Available, All The Time

Point-of-use vending solutions, placed within your plant or job-site, increasing productivity through improved efficiencies. No more tracking down a supervisor, travelling to a remote storeroom or leaving the job site to get the products you need. Employees can now access the things they need, 24/7, when and where they need it.

We provide the EZ Store vending machines, installation, training for your staff, automated inventory replenishment, 24/7 access to stock on-site, complete real-time reporting, employee accountability, and optimization of products, all from our local stock.

HOW IT WORKS

Our EZORDER team will work with you to identify those products that best suit a vending solution, that will also help you realize the best savings possible in reducing direct and indirect costs.

Our EZORDER team will deliver and setup each vending machine, as well as train your staff on how to use the EZ Vending Store. It's as easy as an employee scanning their badge or entering a unique employee number, then selecting the product they wish to dispense on the touch screen.

Our EZORDER team will receive system generated usage reports, identifying those products being consumed as well as those products that need to be replaced—all in real time. You will always have the right products, in the right quantities, all of the time.
